

July 2025 // Issue 12

Summer working

Ticketless

Ticketless will go live on Monday 4th August '25 BE PREPARED!

Operators to have access to MyHualier: myhaulier.heidelbergmaterials.co.uk

Drivers mandatory use of their Track IT device or App created for smartphones

Please ensure you raise any issues with CSC (Customer Service Centre) in order for issues to be resolved in a live scenario.

Follow Track IT training for new drivers, or refresher for current drivers - this can be found on the Track IT tablet by clicking the training app or use the link below:

Night work, collects and non-syncretwork will continue with printed tickets until the next phase.

To safely navigate the challenges of summer driving in an HGV, focus on staying cool, hydrated, and alert!

Prioritise route planning to avoid extreme heat and congestion, and ensure your vehicle is well-maintained, especially the air conditioning and cooling systems.

Staying Cool and Hydrated:

Hydration is Key: Drink plenty of water throughout the day, even if you don't feel thirsty, to prevent dehydration and maintain focus.

Utilize Air Conditioning: If your HGV has air conditioning, use it wisely, but avoid setting it to extreme temperatures to conserve fuel and prevent engine strain.

Sunshades and Ventilation:

Use sunshades to block direct sunlight and keep the cab cooler. Open windows for ventilation, but be mindful of wind noise and dust.

Dress Appropriately: Wear light-colored, loose-fitting clothing made of breathable fabrics to help regulate body temperature.

Rest Breaks: Take regular rest breaks in shaded areas or use reflective screens to cool down during breaks.

Vehicle Maintenance and Safety:

Vehicle Checks: Ensure your vehicle is well-maintained, especially the air conditioning and cooling systems.

Tyre Pressure: Check tyre pressure regularly, as it can be affected by heat.

Glare Protection: Use sunglasses and sun visors to reduce glare and improve visibility.

Additional Tips:

Route Planning: Plan routes to avoid peak heat times and congested areas.

Stay Informed: Monitor weather conditions and be prepared for sudden changes.

Avoid Driving During Peak Heat: If possible, avoid driving during the hottest part of the day (typically between noon and 6 pm).

Communicate: Stay in contact with your employer and colleagues to ensure they are aware of your well-being.

By following these tips, HGV drivers can stay safe, comfortable, and productive during the summer months.

Welcome to Stream

We understand that the telematics and video solutions market is highly competitive, with various players striving to offer the best technology for fleet management.

Leveraging our extensive industry experience, we have developed Stream—an innovative telematics and video platform that not only meets the demands of today's logistics but sets a new standard for excellence.

Stream integrates advanced telematics with high-definition video capabilities, creating a comprehensive solution that empowers fleet managers to enhance safety, optimize operations, and improve overall efficiency. Our team of seasoned professionals has meticulously crafted Stream to exceed industry standards, ensuring that our clients gain a competitive edge in their operations.

What truly distinguishes Stream in this crowded marketplace is our unwavering commitment to innovation and continuous improvement. By harnessing the latest technologies and insights, we deliver a solution that is not only robust and reliable but also adaptable to the evolving challenges of the logistics sector. This positions our clients for success in a fast-paced environment where efficiency and safety are paramount.

Experience the difference with Stream—where deep industry expertise meets cutting-edge technology to provide a telematics and video solution that stands out in today's competitive landscape.

MP Connect Update

GO-live across all regions will be October 2005

We are currently in the latter stages of site set-up and online inductions.

We're populating the drivers webpage daily with new links to site inductions.

These can be found at: drivers.heidelbergmaterials.co.uk

Please remember your driver requirements are 3 levels of compliance:

- Site Inductions
- MP Connect driver subscription
- MPQC Card (MP Skills & awareness course)

For site inductions visit: drivers.heidelbergmaterials.com

For MP Connect subscription: 0115 86001555

For MPQC course: 0115 983 5755
